

# 2025 IMPACT REPORT

Here is what YOU made possible for LAMN in 2025

## A message from Shane:

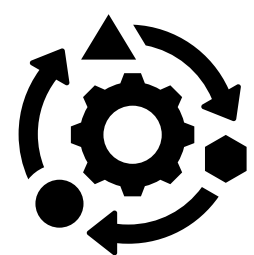

Every day in 2025 we hear from people with disabilities who are forced to choose between repairing essential equipment, keeping their homes safe, or covering basic needs. The volume of requests this year shows how many people are still going without the support they need to live with stability and dignity.

LAMN's work is not only about funding scholarship, equipment, or responding to emergencies. It is about giving people the chance to move through the world with safety, freedom, and confidence.

Cofounder and President, Shane Burcaw
